Unparalleled Quality Control • North America’s Largest CARB-Approved Third Party Certifier (TPC-1) • Trusted, Sought-After Expertise

As a trusted, worldwide leader in formaldehyde testing, Composite Panel Association’s (CPA) International Testing and Certification Center (ITCC) in Leesburg, Virginia, is well-positioned to help.

The ITCC is an independent formaldehyde testing lab designed to help companies comply with the strict CARB Phase 2 product emissions requirements – the very same emissions requirements that will be incorporated into EPA’s final regulation.

Our extensive expertise and excellent reputation for accuracy has been built over thirty years, earning the recognition of the U.S. Department of Housing and Urban Development (HUD), major building codes, and the composite panel industry as THE source of reliable test results. The ITCC is accredited to ISO/IEC 17025:2005 as a testing laboratory by ANSI-ASQ National Accreditation Board (ANAB).

The ITCC will help meet all your formaldehyde screening needs with the following capabilities:

6 Small Chambers (ASTM D6007)

3 Large Chambers (ASTM E1333)

State-of-the-art sample conditioning area made entirely of inert material to ensure ultra-low background levels.

Equipped to utilize perforator, desiccator and various international test methods
